## **Technical Skills**

- Programming Languages: C, Python, x86 Assembly, JavaScript, HTML, Shell(Bash) scripting
- Tools :Familiar with Git(gitlab,github), Postgressql, Emacs, Vim

## **Projects and Assignments**

- Assembler for limited instructions (C language and assembly):

Take an Assembly file as input which contain instructions like add,sub,mov,mul,etc and by comparing the registers and the instructions generates object file.

- Trei Dictionary (C language):

Take input from user in .dict file, convert the input into a tree which will have structure containing array and tree and generates a Dictionary.

- Mini Project of UI and DATABASE connectivity (JS,HTML,PYTHON,PSQL).:

It takes data from database, and show the tables available to user on HTML page, user can do Insert/delete/update operation on the data.

- Working on IOT (beaglebone[octalbonescript]) (JavaScript).:

This project is to do some optimisation in the library for beaglebone which is better than the bonescript, the library is called as OctalboneScript.
